

AMENDMENTS TO SPECIFICATION

Please replace paragraph [0028] on page 12 of the specification with the following amended paragraph:

[0028] The VXML platform 40 may communicate with the SCP 23 using intelligent network application part (INAP) signaling. If the VXML platform 40 is an Alcatel SRP, the SCP 23 communicates with an IP portion of the SRP. That is, the Alcatel SRP is divided into two components: an IP component and a voice interactive media server (VIMS) component.
